Rem.	1.5	23	

Form of Delivery

ISA[®]-ZIN is supplied in the form of round wires in the range 8.0 to 0.04 mm Ø in bare or enamelled condition, also with rayon or silk covering. To a limited extent flat

wires, stranded wires, ribbons and sheets are also manufactured.

Properties and Application Notes

ISA[®]-ZIN is especially noted for high resistance to oxidation and chemical corrosion, as well as a relatively low resistivity. It is used for resistors of any type and for heating cords, cables and heating mats. Ribbons for instance are used for heating of bimetals. The maximum working temperature in air is 500 °C.

2) This value applies to wires of 2 mm diameter. For thinner wires the minimum values will substantially increase, depending on the dimensions.

Notes on Treatment

ISA[®]-ZIN can be worked easily. This alloy can be soldered and brazed without difficulty. All known welding methods can be used.
