
Item # Tpcm 680, Tpcm™ 680 Series Phase Change Material

Tpcm™ 680 Series Phase Change Material

Tpcm™ 680 is a high performance, inherently tacky, easy to rework phase change thermal interface material. Developed specifically to meet the high thermal conductivity and low thermal resistance requirements of Intel® mobile processors. Tpcm™ 680 is optimized for Intel's Penryn Quad-Core mobile processor.

APPLICATIONS

- Microprocessors
- Chipsets
- Graphic processing chips
- Custom ASICS
